Address-Govindgarh, Jaipur

Summary

Passionate and detail-oriented web developer with proficiency in front-end and back-end technologies. Proven ability to build and maintain responsive websites in fast-paced, collaborative environments. Adept at problem-solving and committed to delivering high-quality web solutions.

Skills

- **Front-End:** React.js, JavaScript, Tailwind, HTML5, CSS3, Bootstrap,
- **Back-End:** Node.js, Express.js, MongoDB
- **Tools & Technologies:** Git, GitHub, Visual Studio Code
- **Other:** Responsive Web Design, RESTful APIs, Agile Methodologies, Problem-Solving, Team Collaboration
- **AI Development Tools:** ChatGPT, Google Gemini, AI Blackbox

Education

Bachelor of Commerce

Dr. Br. Ambedkar college - Govindgarh, Jaipur

Graduated: May 2019

Projects

Swiggy Clone

- Developed a Swiggy clone using React.js and Tailwind CSS, replicating key features such as restaurant listings.

Food Delivery Website

- Built a responsive food delivery website using HTML and CSS.
- Designed user-friendly interfaces and ensured cross-browser compatibility.

JavaScript Projects

- **Movie Searching App:** Created a dynamic movie search application using JavaScript, integrating with external APIs to fetch movie data.
- **Digital Clock:** Developed a real-time digital clock using JavaScript, demonstrating proficiency in DOM manipulation.
- **Weather Searching App:** Built a weather search application using JavaScript, fetching data from a weather API and displaying current weather conditions.
- **To-Do List:** Created a functional To-Do List application using JavaScript, featuring add, delete, and mark-as-complete functionalities.

E-Commerce Website

- Developed a full-stack e-commerce platform using React.js, Node.js, and MongoDB.
- Integrated payment gateways and user authentication for a secure shopping experience.
- Deployed the application using Heroku and managed source code with GitHub.

Skills Overview

React.js

- **Component-Based Architecture:** Proficient in building reusable components to develop scalable web applications.
- **State Management:** Experienced with state management tools like Redux, Context API, and hooks (useState, useEffect).
- **Routing:** Skilled in using React Router for dynamic routing.
- **Lifecycle Methods:** Knowledgeable in React lifecycle methods and how to utilize them effectively.
- **JSX Syntax:** Strong understanding of JSX syntax and its usage in creating dynamic web pages.
- **Testing:** Familiar with testing libraries such as Jest and Enzyme for unit and integration tests.
- **Performance Optimization:** Techniques to optimize React applications for better performance.

MongoDB

- **Schema Design:** Competent in designing schemas using Mongoose for MongoDB.
- **CRUD Operations:** Proficient in performing CRUD (Create, Read, Update, Delete) operations.
- **Aggregation Framework:** Experienced with MongoDB's aggregation framework for advanced data processing.
- **Indexing:** Knowledgeable about indexing for performance optimization.
- **Replication and Sharding:** Understanding of replication and sharding for data distribution and availability.
- **Atlas:** Familiar with MongoDB Atlas for cloud database management.
- **Security:** Implementing security measures such as authentication and authorization in MongoDB.

Good Communication

- **Verbal Communication:** Excellent in articulating ideas and technical concepts clearly and effectively during team meetings and presentations.
- **Written Communication:** Skilled in creating comprehensive documentation, including project reports, user manuals, and technical guides.
- **Active Listening:** Proficient in active listening to understand team members' perspectives and feedback.
- **Collaboration:** Experience working in cross-functional teams, fostering collaboration and teamwork.
- **Conflict Resolution:** Ability to manage and resolve conflicts constructively.
- **Public Speaking:** Comfortable with public speaking and presenting technical topics to non-technical stakeholders.

Certifications

- **MERN Stack Development Course** – WS Cube Tech, Jaipur
